CAREER OBJECTIVE

Aspiring computer scientist and full-stack developer with a strong backend focus, experienced in building scalable systems using architecture and AI-assisted workflows. Strong foundation in computer science fundamentals. Driven by continuous learning, innovation and collaboration to build impactful and human-centered technology solutions.

EDUCATION

Parul University, B.Tech in Computer Science Engineering
CGPA: 8.21

Aug 2023 – Present

PROJECTS

AidFlow, AI-Enhanced Welfare & Donation Management System

- Built a production-style full-stack platform enabling NGOs, donors, merchants and beneficiaries with secure role-based workflows.
- Engineered modular REST APIs using Node.js and Express.js enabling secure role-based workflows for NGO, donor, beneficiary, merchant and admin systems, MongoDB and JWT for authentication and fund operations.
- Integrated AI agents for beneficiary eligibility scoring and fraud-risk detection and implemented blockchain-backed audit logs.

Tech Stack: React, Node.js, Express.js, MongoDB, Mongoose, JWT, JavaScript, Solidity, Blockchain, AI Agents

RailMind, AI-powered cognitive railway operating system

- An AI-powered intelligence platform for railway infrastructure management.
- It combines four distinct intelligence layers: Operational Facts, Relationship Intelligence, Semantic Memory & Reasoning Engine.
- Replace 4-hour manual investigation with a 60-second AI pipeline that searches all history, finds patterns, propagates risk, and generates actionable recommendations — automatically.

Tech Stack: Neo4j, Qdrant, Redis, PostgreSQL, Socket.io, OpenAPI, Prisma, LangGraph, NextJS

Production-Grade Backend System, Scalable REST API & Authentication Service

- Designed modular backend architecture (Routes → Controllers → Services → Models) with scalable service layers.
- Implemented JWT authentication, RBAC authorization, validation, session, token and optimized MongoDB queries.
- Added production features including centralized error handling, logging, rate-limiting, CORS and configuration.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT

EXPERIENCE

Web Development Intern

Dec 2025 – Feb 2026

- Developed and integrated frontend UI components with backend REST APIs within a full-stack development.
- Contributing to feature implementation and application functionality improvements.
- Demonstrated strong problem-solving skills and collaborative development practices.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Frontend: HTML, CSS, React, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools: Git, Jenkins, Linux, Postman

Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

ACHIEVEMENTS

- Top 55 Ideas Nationwide — MSME Idea Hackathon 5.0, Government of India
- Finalist — East India Blockchain Summit 2.0, IIT-KGP
- Finalist — Hackoverflow Hackathon
- State Rank 15 — Indian Talent National Olympiad, India
